KSP Quality Policy

Safety always and Quality first.

Kuwait-Saudi Pharmaceutical Industries Company is considered a pioneer in manufacturing and development of pharmaceutical products in Kuwait since its inception. For more than 25 years, KSP has passed several milestones towards becoming a successful player in the pharmaceutical industry providing quality medicines at more affordable prices to several countries across the Gulf region and North Africa.

During this journey, Quality has been an undeniable imperative in deploying KSP's success where it connected all parties together starting from company's employees, customers and different regulatory authorities, in addition to assuring zero compromise on patients and products safety. KSP will continue to actively pursue ever-improving quality by conducting appropriate training programs for all employees continuously and implementing the guidelines that guarantee the maximum safety and efficacy of the products to the compliance level.

The company is committed to achieving the ambition, interest and satisfaction of all involved communities by continual improvement of our quality management system and application of the varied pharmaceutical best practices and current Good Manufacturing Practices guidelines established by different international organizations such as World Health Organization and other reputable regulatory authorities.
